Annual Report of Sexual Assault Kits

November 30, 2022

INTRODUCTION

Arizona Revised Statutes §13-1426 and 13-1427 establish the procedure, time limits, and reporting requirements for the submission and analysis of sexual assault kits (SAKs) in Arizona. ARS §13-1427.A requires law enforcement agencies to report to the Department of Public Safety the following:

1. The number of sexual assault kits that the agency received.
2. The number of sexual assault kits that were submitted to a public accredited crime laboratory for analysis.
3. The number of sexual assault kits that were not submitted to a public accredited crime laboratory for analysis.
4. The reason or reasons for not submitting evidence from each sexual assault kit to a public accredited crime laboratory for analysis.

This report includes SAKs received by agencies during FY2022 and how many of those kits were submitted or not submitted for forensic laboratory analysis.

LAW ENFORCEMENT AGENCIES

The Department of Public Safety collected information from 109 Arizona law enforcement agencies regarding their SAKs received during FY2022. SAK information was collected using the Track-Kit sexual assault kit tracking system which was fully implemented and made available to all law enforcement agencies, medical facilities and public crime laboratories by the beginning of FY2022.

SAK processing information for 107 agencies was reported from the Track-Kit system. The Phoenix Police Department and Mesa Police Department chose to track their sexual assault kits separately, and the Native American tribes have the option to use the system but are not required by the statute to report kit statistics. The Department compiled all information which is summarized in the “Results” section below.

LABORATORIES

Arizona has seven public accredited crime laboratories that perform forensic DNA analyses:

- The DPS Northern Regional Crime Laboratory in Flagstaff
- The DPS Central Regional Crime Laboratory in Phoenix
- The DPS Southern Regional Crime Laboratory in Tucson
- The Phoenix Police Department Crime Laboratory
- The Tucson Police Department Crime Laboratory
- The Mesa Police Department Crime Laboratory
- The Scottsdale Police Department Crime Laboratory

The municipal laboratories provide forensic DNA analysis of SAKs to their respective agencies (and other agencies through intergovernmental agreement), and the DPS laboratories provide analysis to all other Arizona agencies. All the public accredited crime laboratories analyze every SAK submitted for analysis and do not decline analysis of any SAK.

RESULTS

In FY2022, the Department collected data using Track-Kit, a web-based system for tracking all SAKs from the collection of the kit by a forensic nurse examiner, continuing through the transfer to the law enforcement agency and concluding with the laboratory forensic DNA analysis. This system offers real-time tracking of the location of each SAK and provides the status of each kit to all stakeholders in the SAK collection and analysis process.

The Department gathered information from 109 Arizona law enforcement agencies regarding the number of SAKs received by each agency in FY2022. The Track-Kit system was utilized by 107 of the 109 agencies, and the other agencies provided SAK information directly to the Department. The information collected from each agency also includes the number of SAKs submitted to a laboratory for forensic DNA analysis and the reasons SAKs were not submitted to a laboratory. The responses from the individual agencies are included in Appendix A.

A total of 1,652 SAKs were received by these agencies in FY2022, and 1,353 (81.9%) of these kits were subsequently submitted to a laboratory for analysis. For the 299 unsubmitted kits, agencies selected reasons for not submitting the kits for analysis which included:

- The allegations were determined to be unfounded through investigation.
- The victim elected to not move forward with the analysis of the SAK.
- Other

Examples of “Other” reasons include the agency was assisting another agency (the crime occurred in another jurisdiction), the suspect confessed, and the prosecuting attorney declined prosecution.

In addition to the unsubmitted kits, there were also 34 kits collected at medical facilities that are not associated with any law enforcement agencies.

The Track-Kit system allows survivors to log into the system anonymously to track the progress of their sexual assault kit. The system provides them with information regarding when their kit is transmitted from the medical facility to the law enforcement agency or from the law enforcement agency to the forensic laboratory. Survivors can also see when the analysis of the kit has been completed.

During FY2022, 258 survivors accessed the Track-Kit system 1,206 times to view the progress of their kits. This feature gives the survivors much more timely information regarding the progress of their kit analysis while maintaining their privacy. Given this information, survivors can inquire about delays in kit processing which provides another level of accountability for ensuring that the kit analysis is completed in a timely fashion.

APPENDIX A
